Profile:

I currently freelance as a web/graphic designer and I am always seeking new opportunities that will allow the designer/developer within me to grow and flourish.
I am proficient in all levels of the design process and rarely outsource.
I am skilled as both a designer and developer, allowing me to design and program harmoniously.
I solve problems with both creativity and logic, giving me the ability to visually communicate in an imaginative and practical manner.
I am deeply passionate about my work and I feel the smallest details are as equally important as the overall design.
